

BUILDING SURVEYOR

DAVID CLIFTON

BSc (Hons) MRICS MNZIBS MIML FMANZ

David brings extensive expertise and a proven track record to the company. With a background in building surveying across both residential and commercial properties locally and internationally, David focuses on delivering efficient, effective outcomes while collaborating closely with key stakeholders to maximise property value and minimise disruption for owners and tenants.

His in-depth knowledge of local and national building regulations enables him to guide landlords and tenants through maintenance and development processes from concept to completion, ensuring all parties remain informed throughout.

Whether acting as a Client Liaison for Body Corporates during major remediation projects—such as resolving weather-tightness issues—or assisting landlords in obtaining Code of Compliance for historical works, David provides clear guidance and comprehensive updates at every stage.

In addition to his client work, David lectures at the University of Auckland to help develop the next generation of building surveyors and trains and assesses new members of RICS (Royal Institute of Chartered Surveyors) and NZIBS (New Zealand Institute of Building Surveyors).
